

# Nepean Hospital Car Park

The NSW Government has committed \$26 million to construct a new multi-storey car park to support the \$550 million Nepean Redevelopment Stage 1

A new multi-storey car park will be constructed on the corner of Barber Avenue and Parker Streets to support the expansion of services on the hospital campus. The car park will also include a rooftop helipad.

The construction of the car park is being prioritised to free up space on campus for a new hospital tower as part Stage 1 of the Nepean Redevelopment.

CPB Contractors were recently awarded the (Very early contractor involvement) tender and demolition works commenced on 26 October 2017.

Construction on the car park will occur following the development application approval and car park works are scheduled for completion in early 2019.

Every effort is being made to minimise disruption to staff, patient and visitors during the construction period. Your support and patience is appreciated as we progress this important project.

## Now

- Ongoing consultation with consumers and staff to determine the car parking plan for campus
- Demolition of Pialla building to prepare for car park construction

## Next

- Car park construction gets underway
